# SINAMICS V20

The cost-effective, reliable  
and easy-to-use drive for  
basic applications

[usa.siemens.com/sinamics-v20](http://usa.siemens.com/sinamics-v20)

# SINAMICS V20

The perfect drive solution for basic applications

## SINAMICS V20, the versatile drive for basic applications

Today, in an increasing number of applications in plant and machinery construction, individual automation and drive solutions are demanded that automate simple motion sequences with low associated requirements.

With its compact SINAMICS V20, Siemens offers a simple and cost-effective drive solution for these types of applications. SINAMICS V20 sets itself apart with its quick commissioning times, ease of operation, robustness and cost efficiency.

With seven frame sizes, it covers a power range extending from 0.12 kW up to 30 kW (1/6 hp up to 40 hp).

## Minimize your costs

Engineering, commissioning and operating costs as well as those in operation must be kept as low as possible. Well, with our SINAMICS V20, you have precisely the right answer.

To increase energy efficiency, the drive is equipped with a control technique to achieve optimal energy efficiency through automatic flux reduction. Not only this, it displays the actual energy consumption and has additional, integrated energy-saving functions.

## Highlights

### Easy-to-install

- Push-through and wall mounting—side-by-side is possible
- USS and Modbus RTU at terminals
- Integrated braking chopper for 7.5 kW to 30 kW (10 hp up to 40 hp)
- Electromagnetic compatibility (EMC) category C1/C2

### Easy-to-use

- Parameter loading without power supply
- Easy commissioning with mobile device or laptop with web server module SINAMICS V20 Smart Access
- Integrated application and connection macros
- Keep Running mode for uninterrupted operation
- Wide voltage range, advanced cooling design and coated PCBs increase robustness

### Easy to save money

- ECO mode for V/f, V<sup>2</sup>/f / Hibernation mode
- Monitoring energy and water flows
- High overload and low overload mode for FSE

Power range	Voltage range	Control modes
0.12 kW to 30 kW (1/6 hp up to 40 hp)	1AC 200V ... 240V (–10% / +10%) <sup>1), 2)</sup> 3AC 380V ... 480V (–15% / +10%)	V/f V <sup>2</sup> /f FCC V/f multi-point

<sup>1)</sup> Single-phase devices can also be connected to two phases of a 3-phase 120/240V supply system. The voltage between L1 and L2 should be in the 200V to 240V, –10% to 10% (whether phase to phase or phase to neutral). You can find detailed information here: <http://support.industry.siemens.com/cs/document/109476260>

<sup>2)</sup> Voltage tolerance for FSAA/FSAB (–15% / +10%)

# Easy-to-install

Everything from a single source	SINAMICS V20 feature	Your benefits
	<p>Together with SIMATIC PLC/HMI, tested and ready-to-run application examples to connect a V20 drive to a controller are available.</p>	<ul style="list-style-type: none"> <li>■ Different application examples can be downloaded free of charge from the online support portal</li> </ul> <p>For more information, see also page 9 or go directly to: <b>siemens.com/sinamics-applications</b></p>

Installation		
	<p>Compact design, side-by-side mounting and flexible device installation for both wall mounting and push-through mounting.</p> <p>Operation without additional option modules possible.</p>	<ul style="list-style-type: none"> <li>■ Compact installation allows smaller cabinets to be used</li> <li>■ Push-through mounting allows the cabinet to be cooled more easily</li> <li>■ Can be run "out-of-the-box" without other options</li> <li>■ Basic operator actions at a built-in BOP (Basic Operator Panel)</li> <li>■ Frame sizes FSAA and FSAB (1AC 230V) 24% smaller compared to previous frame size FSA within the same power range</li> </ul>

Communication		
	<p>The communication port is available at terminals.</p> <p>The preset parameters of the USS and Modbus RTU are defined in the connection macro.</p>	<ul style="list-style-type: none"> <li>■ Easy integration into existing systems and micro-automation systems</li> <li>■ Easier commissioning through standard libraries and connection macros</li> <li>■ Full flexibility of Modbus RTU settings within the communication with controllers</li> <li>■ Simple connection to a control system (SIMATIC PLC)</li> </ul>

EMC category C1		
	<p>SINAMICS V20 in frame sizes FSAA and FSAB, 1AC 230 V with integrated category C1 EMC filter are available.</p>	<ul style="list-style-type: none"> <li>■ Can be operated in EMC-sensitive environments such as residential areas, without requiring additional external filters</li> </ul>

# Easy-to-use

	SINAMICS V20 feature	Your benefits
<b>Parameter cloning</b>		
<p>Parameter loading</p> <p>Commissioning</p> <p>Copy configuration</p>	<p>Parameter settings can be easily transferred from one unit to another using the parameter loader — even without a power supply.</p>	<ul style="list-style-type: none"> <li>■ Less technical support required</li> <li>■ Short commissioning time</li> <li>■ The product is delivered to the customer already preset</li> </ul>
<b>SINAMICS V20 Smart Access</b>		
<p>SINAMICS V20</p> <p>Smart Access</p> <p>Mobile devices</p>	<p>Wireless commissioning, operation and diagnostics via mobile device or laptop with web server module SINAMICS V20 Smart Access (option)</p>	<ul style="list-style-type: none"> <li>■ Provides easy access to the drive even if it is located in difficult-to-access areas</li> <li>■ Easy operation due to intuitive web user interface and commissioning wizard</li> <li>■ Full flexibility in choosing your end device for engineering as the SINAMICS V20 Smart Access is a web server approach that works with any operating system and any HTML5 capable web browser</li> </ul>
<b>Macro approach</b>		
<p>Fan</p> <p>Macro</p> <p>SINAMICS V20</p>	<p>Connection and application macros to simplify I/O configuration and make the appropriate settings.</p>	<ul style="list-style-type: none"> <li>■ Shorter training and commissioning time</li> <li>■ Integrated and optimized application setting</li> <li>■ Simple connection and application macros can be selected instead of configuring long complicated parameter lists</li> <li>■ Errors caused by wrong parameter settings can be avoided</li> </ul>
<b>Keep Running mode</b>		
<p>SINAMICS V20</p> <p>Motor</p>	<p>The function provides higher productivity in production by automatic adaptation in the case of unstable line supplies.</p>	<ul style="list-style-type: none"> <li>■ Stable operation under difficult line supply conditions</li> <li>■ Higher productivity through prevention of interruptions of the production line</li> <li>■ Adaptation to application-relevant reactions through flexible definition in case of fault / alarm</li> </ul>
<b>Robustness</b>		
<p>SINAMICS V20</p> <p>Motor</p>	<p>Wider voltage range, better cooling design and coated PCB increase robustness of the drive in difficult application environments.</p>	<ul style="list-style-type: none"> <li>■ Operation possible when the line supply voltage fluctuates</li> <li>■ Reliable operation for line voltages: 1AC 200V ... 240V (–10% / +10%)<sup>1)</sup> 3AC 380V ... 480V (–15% / +10%)</li> <li>■ Operation at ambient temperatures between –10° C and 60° C</li> </ul>

<sup>1)</sup> Voltage tolerance for FSAA/FSAB (–15% / +10%)

# Easy to save money

	SINAMICS V20 feature	Your benefits
<b>ECO mode/Hibernation mode — energy reduction during operation and standby</b>		
 <p><sup>1)</sup></p>	<p>Integrated ECO mode for <math>V/f</math> and <math>V^2/f</math> automatically adapts the flux to save energy. The energy consumption can be shown in kWh, CO<sub>2</sub> or even in the local currency.</p> <p>Hibernation mode, drive and motor are only activated when used by the plant or machine.</p>	<p>ECO mode:</p> <ul style="list-style-type: none"> <li>■ Energy saving during low dynamic load cycles</li> <li>■ Tells end users the actual energy that has been saved</li> </ul> <p>Hibernation mode:</p> <ul style="list-style-type: none"> <li>■ Smart hibernation saves energy</li> <li>■ Extended lifetime of motor</li> </ul>

<b>Integrated energy and water flow monitoring</b>		
 <p>V20      Power meter for power measurement</p>	<p>Energy consumption and savings are monitored without the need for power measurement equipment.</p>	<ul style="list-style-type: none"> <li>■ Intuitive values of power consumption and savings without additional investments for measurement equipment</li> <li>■ Values can be shown as kWh, CO<sub>2</sub> or as a currency</li> </ul>

<b>Cost-saving for low overload applications</b>		
 <p>High Overload      Low Overload</p> <p>HO      LO</p>	<p>SINAMICS V20 FSE (22 kW/30 hp and 30 kW/40hp) have two different load cycles.</p> <ul style="list-style-type: none"> <li>■ Low Overload (LO): 110% I<sub>L</sub><sup>2)</sup> for 60s (cycle time: 300s)</li> <li>■ High Overload (HO): 150% I<sub>H</sub><sup>3)</sup> for 60s (cycle time: 300s)</li> </ul>	<ul style="list-style-type: none"> <li>■ With low overload cycle, the drive can reach a higher output current and power. A smaller drive can be used.</li> <li>■ Optimally designed for a variety of applications: <ul style="list-style-type: none"> <li>▪ Low Overload for applications with a low dynamic response (continuous duty)</li> <li>▪ High Overload for applications with a high dynamic response (cyclic duty)</li> </ul> </li> </ul>

<sup>1)</sup> Application and machine-type dependent    <sup>2)</sup> The output current I<sub>L</sub> is based upon the duty cycle for low overload (LO).    <sup>3)</sup> The output current I<sub>H</sub> is based upon the duty cycle for high overload (HO).

# Integrated and innovative support

## Fast product selection and ordering

### The DT Configurator supports you with:

- Selecting the best drive based upon the application
- Selecting the correct part number

### The DT Configurator supplies you with:

- A drive that is optimally tailored to your requirements
- 2D models
- 3D models
- Data sheets
- EPLAN macros

You can directly order the selected components through Industry Mall—the Siemens e-commerce website—and without having to duplicate entries. In order to avoid making mistakes while ordering, the order number is checked to ensure that it is correct.

[siemens.com/dt-configurator](http://siemens.com/dt-configurator)

### SINAMICS SELECTOR app

- Find part numbers quickly and easily
- Scan this QR-code to download the SINAMICS SELECTOR app free-of-charge

## Industry Mall — comprehensive online information and services

### Industry Mall supports you with:

- Selecting products, services and trainings

### Industry Mall supplies you with:

- A product selection of the complete and up-to-date Siemens automation and drive technology product spectrum
- System configuration
- Download of CAX data, data sheets and schematic diagrams
- Online shopping cart orders
- Price and order overview
- Availability check and order tracking

[mall.industry.siemens.com](http://mall.industry.siemens.com)

## SINAMICS V20 — best-in-class service and support

### USA hotline support

(423) 262-5710 or (800) 333-7421

### At home or across the globe

- Global hotline support
- Comprehensive service network of factory-trained repair specialists
- Multiple language web-based support and FAQs

### Online support

The comprehensive online information platform supports you in all aspects of our service and support at any time and from any location in the world.

[siemens.com/automation/service&support](http://siemens.com/automation/service&support)

### Technical support

Expert advice on technical questions with a wide range of demand-optimized services for all our products and systems.

# Technical information

## Overload characteristics (Frame size E only\*)

**Low Overload (LO)** is generally used for applications demanding a low level of dynamic performance (continuous duty), square-law torque characteristic with low breakaway torque and low speed precision.

**For example:** centrifugal pumps, radial/axial fans, reciprocating blowers, radial compressors, vacuum pumps, agitators, etc.

### Low overload (LO) capability

110%  $I_L$ <sup>1)</sup> for 60 s within a cycle time of 300 s

<sup>1)</sup> The output current  $I_L$  is based on the duty cycle for low overload (LO).

**High Overload (HO)** is generally used for applications demanding a higher dynamic performance (cyclic duty), as well as constant torque characteristics with a high breakaway torque.

**For example:** conveyor belts, geared pumps, eccentric worm pumps, mills, mixers, crushers, vertical conveying equipment, centrifuges, etc.

### High overload (HO) capability

150%  $I_H$ <sup>2)</sup> for 60 s within a cycle time of 300 s

<sup>2)</sup> The output current  $I_H$  is based on the duty cycle for high overload (HO).

\* All other frame sizes AA–D have HO rating only

## Easy accessibility from outside the cabinet plus wireless commissioning and operation

Power and control	
Voltage	1AC 230V: 1AC 200V ... 240V (-10% ... +10%) <sup>1)</sup> 3AC 480V: 3AC 380V ... 480V (-15% ... +10%)
Maximum output voltage	100% of input voltage
Supply frequency	50/60 Hz
Line supply type	TN, TT, TT earthed line, IT <sup>2)</sup>
Power range	1AC 230V 0.12 ... 3.0 kW (1/6 ... 4 hp) 3AC 480V 0.37 ... 30 kW (1/2 ... 40 hp)
cos φ / Power factor	≥ 0.95 / 0.72
Overload capability	up to 15 kW: High Overload (HO): 150% I <sub>H</sub> for 60 s within a cycle time of 300 s from 18.5 kW: Low Overload (LO): 110% I <sub>L</sub> for 60 s within a cycle time of 300 s High Overload (HO): 150% I <sub>H</sub> for 60 s within a cycle time of 300 s
Output frequency	0 ... 550 Hz resolution: 0.01 Hz
Efficiency factor	98%
Control modes	Voltage / frequency control mode: linear V/f, square law V/f, multi-point V/f Flux current control mode: FCC

<sup>1)</sup> Single-phase devices can also be connected to two phases of a 3-phase 120/240V 2-supply system. The voltage between L1 and L2 should be in the range of 200V to 240V -10% to 10% (either phase to phase or phase to neutral). You can find detailed information here: <http://support.industry.siemens.com/cs/document/109476260>

<sup>2)</sup> 1AC 230V FSAA/AB unfiltered devices as well as 3AC 480V unfiltered devices, can be operated at IT network.

# System at a glance

## SINAMICS V20

## SINAMICS V20—Options

# Full range of options

## 1 V20 Smart Access

Wireless commissioning, operation and diagnostics with mobile device or laptop with web server module

## 2 V20 BOP

Same function as the integrated BOP (Basic Operator Panel), but can be used for remote mounting. The value and setpoint are changed by rotating the wheel. For remote mounting with IP54 and UL Type 1 enclosure protection level from outside.

## 3 BOP cable

The cable is not included in the delivery. You can use any standard LAN cable with standard RJ45 connector.

## 4 BOP interface

- Connection between drive and BOP
- RJ45 interface is compatible with standard LAN cable

## 5 SINAMICS Memory Card (SD)

- 512 MB (Standard SD cards up to 32 GB are supported)

## 6 Parameter loader

Up to 100 parameter sets with parameter settings can be written from the memory card (SD card up to 32 GB supported) to the drive or saved from the drive to the memory card without connecting the drive to the line supply.

## 7 Line reactor

- Reduces the harmonic current
- Improves the power factor
- Recommended if input current (RMS value) is higher than the rated current of the drive

## 8 Line filter

- Improved EMC performance
- Longer motor cable for FSAA, FSAB, FSA

## 9 Braking resistor

- Dissipates regenerative energy as heat
- 5% duty cycle as default setting

## 10 Braking module

- Shortens the deceleration ramp time
- Suitable for 1AC 230V and 3AC 480V
- Adjustable duty cycle from 5% to 100%
- FSD and FSE already have an integrated braking unit

## 11 Shield connection kit

- Shield connection
- Strain relief

## 12 Output reactor

- Longer motor cable:
- 3AC 480V shielded and unshielded cable: 150 m for FSA to FSD, 200 m / 300 m for FSE
  - 1AC 230V shielded and unshielded cable: 200 m

## 13 Fuse

Recommended fuse corresponding to the EC/UL standard

## 14 Circuit breaker

Recommended circuit breaker corresponding to the EC/UL standard

1AC 200–240V<sup>1)</sup>

EMC Standards	
Without integrated filter	U
With integrated line filter category C2 <sup>2)</sup> (only available for FSB and FSC from 1.1 to 3 kW)	A
With integrated line filter category C1 <sup>3)</sup> (only available for FSAA and FSAB up to 0.75 kW)	B

<sup>1)</sup> Single-phase devices can also be connected to two phases of a 3-phase 120/240V 2-supply system. The voltage between L1 and L2 should be in the range of 200V to 240V –10% to 10% (either phase to phase or phase to neutral. You can find detailed information here: <http://support.industry.siemens.com/cs/document/109476260>

<sup>2)</sup> Disturbance suppression limits according to EN 61800-3 category C2 use in first environment (residential, domestic). The drive system must be installed by specialized personnel under consideration of regional regulations with respect to line harmonics.

<sup>3)</sup> Disturbance suppression limits according to EN 61800-3 category C1 use in first environment (residential, domestic). The drive system must be installed by specialized personnel under consideration of regional regulations with respect to line harmonics.

<sup>4)</sup> Disturbance suppression limits according to EN 61800-3 category C3 use in second environment (industry).

<sup>5)</sup> See specification of EMC standards, page 10

<sup>6)</sup> Additional information about the listed fuses and circuit breakers can be found in Catalogs LV 10, IC 10 and IC 10 AO <http://siemens.com/drives/infocenter>

<sup>7)</sup> BOP interface and BOP integrated standard RJ45 connector compatible for standard Ethernet cable.

<sup>8)</sup> The cable is not included in the delivery. You can use any standard LAN cable with standard RJ45 connector.

<sup>9)</sup> For installation of FSA with fan, please refer to SINAMICS V20 manual. Installation of FSAA/AB, DIN Rail Mounting Kit for FSA install with migration mounting kit together.

<sup>10)</sup> The output current I<sub>l</sub> is based on the duty cycle for low overload (LO).

<sup>11)</sup> The output current I<sub>H</sub> is based on the duty cycle for high overload (HO).
